## School Construction and Maintenance

### **Projects 2022-23**

**Alicia Farrant**  
Board Member

A project at **Acceleration East** to re-roof the main building and replace rooftop heating, ventilation and air conditioning units was completed in July 2021. Interior painting campus-wide is scheduled to be complete by September 2023. Exterior painting campus-wide is scheduled to be complete by November 2023.

At **Blankner School**, the track was replaced in August 2022. Interior painting campus-wide was completed during the first half of 2022. The fire alarm, intercom, closed-captioning TV and intrusion protection system is being replaced by December 2023. Approximately four portables are expected to be removed by the end of 2023.

At **Boone High**, acoustical treatments for Building 800 and stucco repairs and painting of selected exteriors were completed in August 2021. A chiller was replaced in July 2022. Repairs to a concrete walkway and stairs are scheduled to be complete by September 2022. A parking lot restoration project is scheduled to be completed by September 2023.

A multi-system repurpose project at **Cherokee School** is scheduled to be complete in 2024.

At **Conway Elementary**, an electronic marquee sign replaced a changeable letter marquee and was connected to the school via fiber optics in a project that will conclude in September 2022. A low-voltage, intrusion-detection system installation project is scheduled to be complete by July 2023.

At **Cypress Creek High**, freestanding announcer booths are scheduled to be installed at the softball and baseball fields by September 2022. Replacement fuel tanks were installed in August 2022. Approximately one portable is expected to be removed by the end of 2023. Two portables were also installed to support a Pre-K program that began during the 2022-23 school year.

At the **East River Transportation Compound**, two portables will be renovated by September 2022.

At **Endeavor Elementary**, a comprehensive renovation is set to begin design in 2023 with construction set to begin in 2024 and completion in 2025. In addition, an electronic marquee sign replaced a changeable letter marquee and was connected to the school via fiber optics in a project that will conclude in September 2022. Approximately eight portables are expected to be removed by the end of 2023.

At the **Food and Nutrition Services administrative building**, an existing cooler and freezer and its components along with electrical power and additional lighting, building-automation controls, lightning protection and security fencing are scheduled to be complete by December 2023.

At the **Fort Gatlin administrative building**, a lift station was relocated. The concrete pad was removed and replaced with a “natural lakefront environment,” including a retention pond to catch runoff. The project should be complete by September 2022.

At **Freedom High**, installation of the new rubberized track and improved field events areas were completed in 2021. Replacement fuel tanks were installed in August 2022. The fire alarm, intercom, closed-captioning TV and intrusion-protection system is being replaced by December 2023. A LED-conversion project should be completed by October 2023. Approximately 40 portables are expected to be removed by the end of 2023.

At **Freedom Middle**, the fire alarm, intercom, closed-captioning TV and intrusion-protection system is being replaced by December 2023. A LED-conversion project should be completed by October 2023. Approximately eight portables are expected to be removed by the end of 2023.

At the **Hanging Moss Transportation Services administrative building**, the heating, ventilation and air conditioning system in buildings 3 and 5 is scheduled to be complete by June 2024.

At **Hunter's Creek Elementary**, a classroom addition is set to begin design in Fall 2022 and be complete in 2024. An electronic marquee sign replaced a changeable letter marquee and was connected to the school via fiber optics in a project that concluded in September 2022. Approximately three portables are expected to be removed by the end of 2023.

At **Hunter's Creek Middle**, exterior painting campus-wide is scheduled to be complete by November 2023. A classroom addition is scheduled to start design in Fall 2022 and is expected to be complete in 2024. Approximately eight portables are expected to be removed by the end of 2023.

At **John Young Elementary**, an electronic marquee sign replaced a changeable letter marquee and was connected to the school via fiber optics in a project that will conclude in September 2022. Approximately one portable is expected to be removed by the end of 2023.

**Lake Buena Vista High** opened in August 2021 to provide relief to Dr. Phillips and Freedom high schools. The school includes classrooms, labs, administration, cafeteria, auditorium and a media center. The school also has the latest classroom technology, a culinary lab, athletics amenities and separate bus and car loops. A new fuel tank was installed in August 2022. A CTE lab conversion project is scheduled to complete in January 2023 and a softball field drainage project is scheduled to complete in November 2022.

At **Lake George Elementary**, an electronic marquee sign replaced a changeable letter marquee and was connected to the school via fiber optics in a project that has been completed. Approximately four portables are expected to be removed by the end of 2023.

At the **Lake Nona bus compound**, the heating, ventilation and air conditioning system in Buildings 3 and 5 is scheduled to be complete by June 2024.

At **Lancaster Elementary**, an electronic marquee sign replaced a changeable letter marquee and was connected to the school via fiber optics in a project that will conclude in September 2022. Exterior painting campus-wide is scheduled to be complete by November 2023. Replacing the closed-captioning TV security cameras on campus should be complete by August 2023.

At **McCoy Elementary**, an electronic marquee sign will be replacing a changeable letter marquee and will be connected to the school via fiber optics in a project that has a targeted completion of December 2022. The fire alarm, intercom, closed-captioning TV and intrusion-protection system is being replaced by December 2023. Interior painting campus-wide is scheduled to be completed by October 2023. A renovated heating, ventilation and air conditioning system should be completed by August 2024.

At **Meadow Woods Elementary**, an electronic marquee sign replaced a changeable letter marquee. The new marquee was connected to the school via fiber optics in a project that will conclude in September 2022.

A comprehensive renovation of **Meadow Woods Middle** was completed in August 2021 and included remodeling/refurbishment of buildings 1 through 8.

At **Oakshire Elementary**, an electronic marquee sign replaced a changeable letter marquee and was connected to the school via fiber optics in a project that will conclude in September 2022. Approximately 12 portables are expected to be removed by the end of 2023.

At **Shenandoah Elementary**, exterior painting campus-wide was completed in July 2021. Replacement of air conditioning chillers also was completed in November 2020. An electronic marquee sign replaced a changeable letter marquee and was connected to the school via fiber optics in a project that will conclude in September 2022. The closed-captioning TV security cameras are scheduled to be complete by August 2023. Approximately two portables are expected to be removed by the end of 2023.

At **South Creek Middle**, the fire alarm, intercom, closed-captioning TV and intrusion-protection system is being replaced by December 2023. Exterior painting campus-wide should be complete by November 2023.

At **Southwood Elementary**, exterior painting campus-wide was completed in September 2021. An electronic marquee sign replaced a changeable letter marquee. The new marquee was connected to the school via fiber optics in a project that will conclude in September 2022.

**Stoneyck Elementary** opened in August 2022 in the Meadow Woods/Boggy Creek area to provide relief for Wetherbee and Wyndham Lakes elementary schools. This project included construction of a two-story prototype elementary school building with classrooms, administration, art, music, kitchen, cafeteria/multi-purpose room, media center, bus and car loops and the latest classroom technology.

At **Sunshine Elementary**, six portables were added during Summer 2022.

At **Walker Middle**, the new, closed-captioning TV security cameras are scheduled to be installed by August 2023. A chiller should be replaced by November 2024.

At **Waterbridge Elementary**, an electronic marquee sign replaced a changeable letter marquee. The new marquee was connected to the school via fiber optics in a project that will conclude in September 2022. The fire alarm, intercom, closed-captioning TV and intrusion-protection system is being replaced by December 2023. Approximately 20 portables are expected to be removed by the end of 2023.

At **West Creek Elementary**, an electronic marquee sign replaced a changeable letter marquee and was connected to the school via fiber optics in a project that will conclude in September 2022. The air conditioning, closed-captioning TV, the fire alarm, lighting and other multi-systems should be complete by November 2024. LED conversion pilot project is scheduled to be complete by October 2023. Approximately 14 portables are expected to be removed by the end of 2023.

At **Wetherbee Elementary**, an electronic marquee sign replaced a changeable letter marquee. The new marquee was connected to the school via fiber optics in a project that will conclude in September 2022. Exterior painting campus-wide is scheduled to be complete by November 2023. Approximately one portable is expected to be removed by the end of 2023.

At **Winegard Elementary**, an electronic marquee sign replaced a changeable letter marquee and was connected to the school via fiber optics in a project that will conclude in September 2022.

At **Wyndham Lakes Elementary**, an electronic marquee sign replaced a changeable letter marquee and was connected to the school via fiber optics in a project that will conclude in September 2022. The fire alarm, intercom, closed-captioning TV and intrusion-protection system is being replaced by December 2023. Exterior painting should be complete by November 2023. Approximately 16 portables are expected to be removed by the end of 2023. A renovated heating, ventilation and air conditioning system should be complete by August 2024.
